

XR2 Mechanical Seal

The SEPCO[®] XR2 is easily assembled with only two halves. O-rings and gaskets are factory installed and do not require user attention. This assures factory tested leak free secondary sealing components. The XR2 has a balanced design which allows for pressures up to 200 psi (17 bar). This design feature greatly increases the range for applications of a split seal.

FEATURES

- Balanced
- Nonclogging and provides positive drive to the stationary seal face
- Eliminates the need to dismantle any piece of equipment, large or small

OPERATING PARAMETERS

- Temperatures up to 250°F (121°C)
- Pressure up to 200 psi

Certified to ISO 9001:2015 Standards
