PRODUCT FEATURES

REP-G series chemical process pumps comply with ASME/ANSI B73.1M standard. With a maximum capacities of 7000GPM, maximum head of 730 feet, temperatures to 371°C and pressures to 375PSIG, this series pumps are designed for total range of industry services. Besides extended pump life, its' back pull-out design, external impeller adjustment and maximum interchangeability simplify the maintenance. Fully open impeller, full 50/60 Hz coverage and various sizes make hydraulic performance optimum. It is the best choice for chemical, petrochemical, pulp & paper, primary metals, food & beverage and general industries. Both bare shaft pump and pump package unit with base plate and motor are available. Various material constructions can be offered according to requirement.
